

SAND, SALT, COAL FINES

Brush Plunger

PROBLEM

Wells are producing sand, salt and coal fines

-or-

Marginal wells need a better sealing plunger.

SOLUTION

Brush plungers wipe sand, salt and coal fines from the tubing walls during daily trips up and down hole.

PRODUCT OVERVIEW: The PCS Brush Plunger has a spiral-wound, flexible brush that efficiently removes sand, salt or coal fines. The oversized nylon brush creates an excellent seal despite variations in the tubing.

PRODUCT SPECS:

Brush Plunger
