

**SAND, SALT, COAL FINES**

# Sand Plunger

## PROBLEM

Wells are producing sand, salt or coal fines, causing standard plungers to become stuck in the tubing or lubricator.

## SOLUTION

Sand plungers allow for gas to flow through the plunger, cleaning sand from the grooves, allowing the plunger to move more efficiently in the well's tubing.

---

**PRODUCT OVERVIEW:** The PCS Sand Plunger is an economical, durable, solid plunger with clean out holes that allow the gas to flow through the plunger, avoiding sand build up and preventing the plunger from sticking.

## PRODUCT SPECS:

Sand Plunger

Tubing Size	Standard OD	Optional
2 1/16"	1.630	N/A
2 3/8"	1.877	1.900, 1.890
2 7/8"	2.345	N/A
