

# PCS Smart Plunger<sup>®</sup>

## PROBLEM

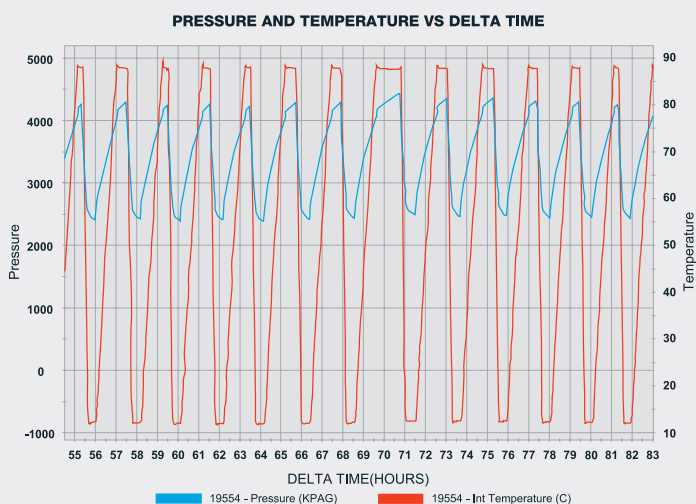

Accurately gauging down hole temperature and pressures, as well as tracking down hole plunger arrivals.

## SOLUTION

Down hole temperature and pressure data loggers.

**PCS PRODUCT ADVANTAGE:** The PCS Smart Plunger<sup>®</sup> is a unique plunger that has a hollowed core which contains a pressure and temperature data logger. The data logger easily gains data for well optimization and conducts draw down and build up tests.

While the plunger is running up and down hole, the data logger inside the plunger is reading continual temperature and pressures which help you more accurately track how your well is producing and make modifications necessary for increasing your production.
